

Summer Camp Program

Dear Friends & Families,
Dear Parents,

Our Summer Camp 2024 will be filled with adventure and excitement. We are currently planning the schedule for each week according to this overview:

Week 1: Art & Nature (June 24 to 28, 2024)

Renowned artist Ms Emma Lang will introduce us to different art materials, artists and techniques in a fun and easy to understand way. We can bring our masterpieces home for our families to enjoy!

Week 2: Discovering Vienna (July 1 to 5, 2024)

We are roaming the city and the surrounding area to pursue exciting activities, like visiting a firefighter station, exploring a power plant, enjoying the palace of Schönbrunn and its gardens, discovering the famous Schloss Hof palace and we will also be safe and active with activities like Indoor Skydiving (suitable for children aged 8 years and older) and many others.

Week 3: Engineering & Science (July 8 to 12, 2024)

Robbo Club is going to hold a fascinating robotics workshop and we will focus on the science areas to broaden our horizons at the Technical Museum and Zoom Children's Museum. Of course, we hope to make use of great weather in July, so we will also enjoy the famous Gänsehäufel beach and cool off in refreshing water!

Week 4: Health & Movement (July 15 to 19, 2024)

Let's explore the many ways we can be mobile and move around. Whether it is while doing sports and being active or by dealing with traffic and how to safely navigate our world. Sports are also a big part of staying healthy, so we will get to do many new sports, like tennis and geo caching to stay fit and spend hours filled with fun in the fresh air!
